# Firefox
Rediscover the web

Themes and Extensions

Firefox is the most customizable browser on the planet; you can effortlessly tailor Firefox to your needs for the best possible browsing experience. Themes allow you to customise the appearance, while extensions offer enhanced features and functionality.

The Mozilla Update community <http://update.mozilla.org> offers a wide variety of themes and extensions. Installing is as simple as choosing what you like and selecting **install now** — the feature will be automatically downloaded and installed for you.

Give us 5 minutes and we'll give you the world! Let us show you in 5 quick and easy steps the features and benefits of using Firefox.

Tabbed Browsing

Tabbed Browsing is a powerful feature that makes surfing the web faster and more convenient. Managing multiple web pages within a single window helps to keep your desktop and taskbar free from clutter; and allows you to keep reading while other pages load in the background.

The intuitive interface and keyboard shortcuts that make it easy to open and switch between multiple tabs, save you time and help you to find and read more information, faster. Simply press **Ctrl+T**, or middle-click a link to open a new tab.
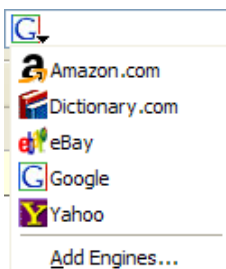

Popup Blocking

Firefox stops popup ads from interfering with your browsing experience. When a website attempts to open a popup, Firefox puts you in control — the information bar is displayed to let you know; and **you** decide whether or not the popup should open, or automate the process to let Firefox decide for you.

Live Bookmarks

Bookmarks are equivalent to Internet Explorer's Favorites which will be automatically imported during setup. **Live Bookmarks** allow you view the latest headlines directly from websites in your bookmarks toolbar or menu. Many sites are already enabled for Live Bookmarks and Firefox lets you know by displaying the orange Live Bookmarks button in the status bar — subscribing is an effortless task.

Smart Search

Search the web with any search engine you like using the convenient search bar. Firefox comes configured with several popular search engines that can be easily extended by choosing from hundreds of additional search plug-ins.

Find as you type allows you to search the current page simply by typing. As you type, the **find toolbar** will display and the matching text will be immediately highlighted; helping you to find what you're looking for, faster than ever.
